PROFESSIONAL PROFILE

NLP-focused junior engineer specializing in retrieval-augmented generation, document ingestion and search quality. Has practical experience with multilingual corpora, vector databases, reranking and retrieval evaluation. Comfortable with API development and basic agent routing, but less experienced with infrastructure automation and complex multi-agent systems.

KEY STRENGTHS

- Designed RAG pipelines with chunking, metadata filters, hybrid retrieval and reranking.
- Hands-on with Qdrant, LlamaIndex, LangChain and multilingual Arabic/English document sets.
- Treats retrieval quality as an engineering problem with labeled queries, Recall@k and citation checks.

PROFESSIONAL EXPERIENCE

NLP / AI Intern | Lexora Knowledge Systems - Amman, Jordan **Aug 2025 - Jul 2026**

- Built ingestion pipelines for PDF, DOCX and HTML knowledge sources and normalized metadata for downstream retrieval.
- Implemented dense retrieval in Qdrant with metadata filtering and added BM25-style keyword retrieval for hybrid search experiments.
- Improved Recall@5 on a 200-query internal benchmark from 0.71 to 0.86 through chunking changes, query rewriting and reranking.
- Integrated retrieved passages into cited LLM answers and added checks for missing or unsupported citations.
- Created a basic LangGraph router that selected between policy search, glossary lookup and escalation to a human reviewer.

NLP Research Trainee | Language Technology Student Lab **Jan 2025 - Jul 2025**

- Cleaned and annotated bilingual Arabic/English question-answer pairs for retrieval experiments.
- Compared multilingual embedding models and documented trade-offs in quality, latency and memory use.
- Built notebooks for retrieval metrics and qualitative failure review.

SELECTED PROJECTS

HR Policy Assistant - *LlamaIndex, Qdrant, FastAPI, OpenAI API*

Built an employee policy assistant with document-level permissions, metadata filters, source citations and a refusal path when evidence is insufficient.

Arabic-English RAG Benchmark - *sentence-transformers, Qdrant, Pandas*

Created a small benchmark of 150 bilingual queries and compared embedding models, chunk sizes, top-k values and reranking strategies.

Contract Clause Finder - *Python, BM25, embeddings*

Developed a hybrid retrieval prototype that locates relevant clauses across sample contracts and returns highlighted evidence snippets for reviewer confirmation.

TECHNICAL SKILLS

RAG / Search	Qdrant, Chroma, LlamaIndex, LangChain, embeddings, hybrid retrieval, reranking, metadata filtering, retrieval evaluation
NLP	sentence-transformers, Hugging Face, tokenization, multilingual/Arabic text processing
LLM Apps	OpenAI API, structured outputs, prompt design, basic LangGraph routing, citation grounding
Backend	Python, FastAPI, Pydantic, PostgreSQL, REST APIs
Engineering	Git, pytest basics, Docker basics, Linux; limited CI/CD and cloud administration
Languages	Arabic - Native | English - Full professional proficiency | German - Basic (A2)

EDUCATION

B.Sc. Computer Science | German Jordanian University **2021 - 2025**

GPA: 3.44/4.00 | Capstone: Multilingual Retrieval-Augmented Assistant for Institutional Documents

CERTIFICATIONS & LEARNING

- DeepLearning.AI - Building and Evaluating Advanced RAG Applications (2025)
- DataCamp - Introduction to Embeddings with the OpenAI API (2025)
