Noor Al-Khatib

Junior Front-End Developer | AI Tools Enthusiast

Amman, Jordan | +962 7 9000 2875 | noor.alkhatib.cv@example.com | linkedin.com/in/noor-alkhatib-dev | github.com/noor-alkhatib-demo

PROFESSIONAL SUMMARY

Junior front-end developer with hands-on experience building responsive web interfaces and integrating third-party APIs. Has experimented with generative-AI products, prompt design, and low-code chatbot builders. Stronger in user interfaces than Python, backend engineering, or ML. Seeking to transition into AI application development, with limited current exposure to agent orchestration, RAG, vector search, evaluation, and secure tool execution.

TECHNICAL SKILLS

Front End	JavaScript, TypeScript basics, React, HTML, CSS, Tailwind CSS
APIs / Web	REST API consumption, JSON, browser fetch, basic authentication flows
AI Exposure	ChatGPT, prompt templates, low-code chatbot tools, OpenAI API via JavaScript tutorials
Developer Tools	Git/GitHub, VS Code, Vercel, npm, Postman basics
Limited Exposure	Python, FastAPI, SQL, Docker, LangGraph, embeddings, vector databases, automated testing

EXPERIENCE

Junior Front-End Developer - PixelRoute Studio (Fictional)

Amman, Jordan | Aug 2025 - Present

- Implemented responsive React pages, reusable UI components, and form validation for small business web applications.
- Integrated REST endpoints supplied by backend developers and handled loading, error, and empty states in the UI.
- Added a FAQ chatbot widget using a hosted no-code AI service and configured prompt instructions and canned fallback responses.
- Deployment work focused on static front-end hosting; backend services, databases, security controls, and observability were owned by other team members.

Web Development Intern - BrightLoop Digital (Fictional)

Amman, Jordan | Mar 2025 - Jun 2025

- Converted Figma mockups into responsive web pages and fixed browser compatibility issues.
- Consumed public APIs for weather and content demos and displayed results in React components.
- Created simple prompt templates for marketing-copy experiments using a browser-based generative-AI tool.

SELECTED PROJECTS

AI Cover Letter Helper - Front-End Prototype

- Built a React interface that sends user-provided job details to an LLM API through a simple serverless function.
- Focused on prompt wording and UI; no agent loop, tool calling, RAG, evaluation suite, persistent state, or role-based access controls.

Portfolio Support Bot - Low-Code Demo

- Configured a hosted chatbot builder with a small manually entered FAQ knowledge base.
- Did not implement embeddings, retrieval, vector storage, backend orchestration, or automated quality evaluation.

EDUCATION

B.Sc. Computer Information Systems - Capital Horizon University (Fictional)

Amman, Jordan | 2021 - 2025 | GPA: 3.28/4.00

COURSES & CERTIFICATES

- React Development Fundamentals - online certificate, 2025
- Prompt Engineering Basics - short course, 2026

LANGUAGES

Arabic: Native | English: Professional working proficiency
